

Parking Lot Replacement, EWRP

Project Number: 14-714-21

Service Area: North

Location: Egan WRP

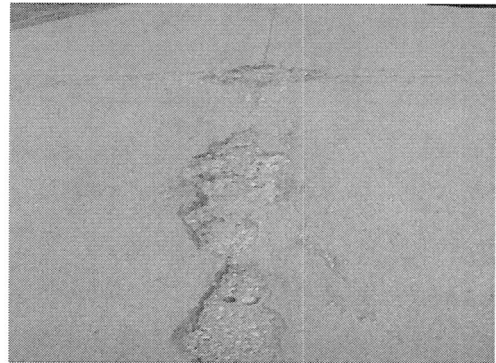

Engineering Consultant: In-house design

General Contractor: To be determined

Estimated Construction Cost: \$1,100,000

Contract Award Date: August 31, 2015*

Substantial Completion Date: September 1, 2016*

Project Description: Replacement of concrete roads and parking lot at the Egan WRP. This project entails a complete replacement of the almost 40-year-old parking lot and access driveways at the Egan WRP, including the installation of a bioretention area and permeable pavers over the parking lot.

Project Justification: At the Egan WRP, the aging concrete is failing and developing large potholes. The potholes create a driving hazard on roads and a walking hazard in the parking lots. This project will be applied towards the green infrastructure requirements of the recently lodged consent decree.

\$1,100,000 split between 2015/2016, \$330,000/\$770,000 respectively.

Project Status: Project is under design.
