

# THCR-G1 (Levee only) Glenwood, IL

Levee is approximately 1715 feet long with a top elevation of 620.5 feet. The anticipated 100 yr-flood height is predicted to be 617.43 feet using the Little Calumet River Detailed Watershed Plan models. The levee is expected to eliminate flood damages up to the 100-yr event for 31 residential structures.
