

(January 18, 2018 Board Meeting)

Attachment 2  
CO Status Report December 2017

**02-111-3M, TARP Pump #8 Rehabilitation Mainstream Pumping Station.** The contractor completed the reassembly of Pump and Motor. All components have been installed and are being tested as the weather and reservoir construction permits. Final completion is anticipated this quarter.

**15-265-3D, Safety Railing Around Tanks, Calumet WRP.** The contractor has completed all field work and the contract is now in the closeout stage. It is anticipated that the final payment will be this quarter.
