

## Westchester Pumping Station Relief Sewer, SSA

<b>Project Number</b>	21-168-3S
<b>Service Area</b>	Stickney
<b>Location</b>	Westchester, IL
<b>Engineering Consultant</b>	In-house design
<b>Engineering Contractor</b>	To be determined
<b>Estimated Construction Cost</b>	\$6,650,000
<b>Contract Award Date</b>	December 2023
<b>Substantial Completion Date</b>	December 2024

<b>Project Description</b>	The project entails the installation of a 45-inch diameter sewer in order to provide relief to the Berkley-Hillside Intercepting Sewer and Broadview-Bellwood Intercepting Sewer during wet weather by diverting flow to the Roosevelt Road leg of TARP at DS-D34-AI.
<b>Project Justification</b>	The Westchester Pumping Station was constructed in 1951 to provide relief to both the Berkley-Hillside Intercepting Sewer and the Broadview-Bellwood Intercepting Sewer. The Westchester Pumping Station relieves the intercepting sewer by discharging combined sewer overflow into Addison Creek. The construction of the proposed sewer should reduce the frequency of combined sewer overflow events in Addison Creek by diverting the flow to the Roosevelt Road leg of TARP at DS-D34-AI.
<b>Project Status</b>	Design
