

Aeration Blower Improvements, SWRP

Project Number 24-901-31
Service Area Stickney
Location Stickney WRP
Engineering Consultant In-house design
Engineering Contractor To be determined
Estimated Construction Cost \$15,500,000

Contract Award Date July 2026

Substantial Completion Date October 2031

Project Description The Aeration Blower Facility at the Stickney WRP is currently operated by obsolete equipment. This project entails upgrading and replacing the old equipment.

Project Justification The current controllers and input/output modules are part of a line of hardware that was discontinued in 2017. Procuring hardware, software, and technical support has become increasingly difficult and costly due to the equipment's obsolescence. Upgrading to a new system will make the facility's equipment more reliable and sustainable. Equipment temperature and vibration monitor system field devices will also be upgraded.
