

Conceptual Stormwater Project Prioritization List

February 28, 2025

Applicant Application ID Project Title	Project Description	Percent of Municipality Area Classified as DIA	Impacted Structures‡	Prioritization *
<b>Riverdale Park District</b> 2024-0004-CN Stormwater Improvements in Riverdale	Provide engineering assistance to develop green infrastructure plans for managing stormwater near Clark Park.	94%	10	A
<b>South Holland</b> 2024-0001-CN Streambank Stabilization in South Holland	Investigate and develop an engineered solution to severe streambank erosion along Thorn Creek, which impacts several residential properties along 173rd street.	32%	6	B
<b>Hickory Hills</b> 2024-0003-CN Sewer Atlas Modernization in Hickory Hills	Develop GIS inventory of existing stormwater infrastructure for use in future flood analysis and evaluation.	39%	N/A	C

‡ The number of impacted structures listed is based on information provided by the applicant. As conceptual work advances, the impacts of flooding within the project areas will be better defined.

\* Prioritization is based on a point-in-time evaluation by MWRD and may change as the project's planning and design progresses. Prioritizations are prepared annually after Stormwater Conceptual Project applications are submitted.
