

Elevator Maintenance at Various Locations

Project Number	26-614-11, Groups D & E	
Service Area	Calumet and Stickney	
Location	Calumet WRP and Mainstream Pumping Station	
Engineering Consultant	In-house design	
Engineering Contractor	To be determined	
Estimated Construction Cost	\$1,683,300.00 to \$2,037,700.00	
Contract Award Date	July 2026	
Substantial Completion Date	December 2028	
Project Description	This project entails modernizing the east and west Tunnel and Reservoir Plan elevator controls at the Calumet WRP and rehabilitating the north vent elevator at the Mainstream Pumping Station.	
Project Justification	Elevator entrapments result in lost employee productivity and carry the risk of increasing the number of Workers' Compensation claims. Modernization of the Calumet WRP and Mainstream Pumping Station elevators will address this risk by providing a more reliable vertical transportation system for District employees and visitors. Elevator components, including the controllers and variable frequency drives, are obsolete and no longer supported by the manufacturer.	
Project Status	Planning
